To whom it may concern,

Re: Reference for Universal Underground Limited

Energyworks Ltd is one of New Zealand's leading specialised multi-disciplined engineering companies and provides construction and maintenance services for the Oil & Gas industry. Our clients have strict performance criteria and we demand the same high level of performance from our sub-contractors.

We have employed Universal Underground Limited (UUL) to provide Horizontal Directional Drilling services on a number of large pipeline contracts including the Cheal Pipelines for Tag Oil, the Ahuroa Gas Pipeline for Contact Energy and the Mangahewa Expansion Gathering and Export Lines for Todd Energy. UUL have performed exceptionally well for us and are our preferred contractor for works of this nature. Their management staff and site teams have proven to be experienced and knowledgeable and they are always responsive to our programme requirements. Commercially, we receive quotations on time and invoicing is always prompt and accurate. Documentation is produced as required, including safety plans, bore plans, procedural information and as built drawings.

It is a pleasure to deal with Neil and Tim and their staff and we have no hesitation in recommending them to others.

Sincerely

Energyworks Ltd

Michael Braggins

Contracts Manager
